Megan,

Tank/Tonka/Pippin had only received his parvo/ distemper vaccination and a simple health evaluation by the rescues appointed vet. I also had talked to this odd fellow, and he did indeed ask to postpone his neuter and rabies shot until he had gained more weight. After showing him the feedback I had gotten from other professional vets he refused comment. His Practice has been reported, and it seems to be slowly closing down. **With 28 years in experience** I cannot believe the shame in not only this rescue, but everyone else involved in it. We have 2 dogs, and 4 cats to place and the rescue and all operations will be suspended. Furthermore, I will be taking Pippin off the adoption list and I honestly wish the best for him and everyone in his situation, mostly the true heroes. Thank you Megan and Justin for being helpful and noble characters. Feel free to email this address for anything needed.

Michael Mancini
Country Side Rescue Supervision Unit.
